FOR IMMEDIATE RELEASE

ONE OF THE FASTEST GROWING DIALYSIS PROVIDERS IN THE U.S. SELECTS STERIMED AS EXCLUSIVE WASTE REMEDIATION TECHNOLOGY

Hackensack, NJ – October 20, 2008 – Caprius, Inc. (OTCBB: CAPI) announced that its subsidiary, MCM Environmental Technologies, Inc. (“MCM”), has entered into an exclusive supplier relationship with Liberty Dialysis – Hawaii Region (“Liberty-Hawaii”) part of Liberty Dialysis LLC (“Liberty Dialysis”) to provide its SteriMed on-site medical treatment technology. Under the provisions of the relationship, MCM will install the SteriMed in Liberty-Hawaii’s *de-novo* dialysis clinics, as well as in several of their existing dialysis clinics that will be retrofitted.

Liberty Dialysis, a medium volume dialysis provider with 70 plus dialysis centers and patient growth of over 40% during 2007, is the largest renal dialysis provider in the state of Hawaii. Liberty-Hawaii, in conjunction with their corporate goals, remains focused on raising the bar in the dialysis healthcare market not only by providing optimal care for their patients, but by taking the initiatives to contribute to maintaining the pristine environment of the Hawaiian Islands.

Dwight Morgan, President & CEO stated, “The goal of our relationship is to provide Liberty-Hawaii with access to our SteriMed technology which is a key enabler of operating cost savings in the fixed reimbursement healthcare market of dialysis. In today’s culture of environmental consciousness, the SteriMed will afford Liberty-Hawaii with unique environmental impact such as carbon, water and solid waste footprint savings. We are extremely pleased that Liberty-Hawaii has chosen our SteriMed technology into their program which positively contributes to preserving the environment in Hawaii.”

Jane Gibbons, Executive Vice-President for Liberty Dialysis-Hawaii Region, commented, “We’re caretakers of people and the environment, and Liberty Dialysis allows its business leaders to make decisions at the local level that are reflective of local needs.” She further stated, “We’re not adopting new processes and standards that drive costs up; we go with cost neutral or lowered costs. There is no better alternative than the SteriMed given that Medicare has a stringent capitated dialysis reimbursement which drives our firm to constantly seek out technologies for cost savings in this fixed-reimbursement health care environment.”

About Caprius

Caprius, Inc. is a manufacturer of proprietary equipment for the on-site disinfection of infectious medical waste through its subsidiary, M.C.M. Environmental Technologies, Inc. The Company’s innovative SteriMed technology simultaneously shreds and disinfects solid and liquid regulated medical waste, reducing the volume by up to 90% and rendering it harmless for disposal as ordinary waste. The SteriMed units are economical, compact, efficient and convenient, as well as environmentally friendly. The MCM patented technology offers an alternative to hauling and

incinerating medical waste. Industry analysts estimate the medical waste market to be approximately \$3 billion in the U.S. and approximately \$10 billion worldwide. More information on the Company and MCM can be found at www.caprius.com and www.mcmetech.com

Safe Harbor Statement

This press release may contain forward-looking statements that involve risks and uncertainties. These statements refer to future plans, objectives, expectations and intentions. These statements may be identified by the use of words such as “anticipate,” “believe,” “intend,” “plan,” “expect” and other similar expressions. The Company’s actual results could differ materially from those discussed in, or implied by, such forward-looking statements. You should also be aware of risks and uncertainties that, in the Company’s view, could cause actual results to differ materially including changes related to regulatory and environmental approvals, manufacturing, operations, capital needs, technological advances by competitors and changes in health care reform, including reimbursement programs.

Certain information concerning economic trends and performance is based upon or derived from information provided by third-party consultants and other industry sources.
